

Mirrorfinish Metal Polish Pty.Ltd

MATERIAL SAFETY DATA SHEET. "Mirrorfinish Metal Polish

Effective date: Jan. 1, 2009

Page 1 of 6

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Product (Material) Name : Mirrorfinish Metal Polish

Other Names: Part No. MFPOL-250

Recommended Use: Viscous liquid abrasive composition for polishing metals.

Supplier: Mirrorfinish Metal Polish Pty.Ltd

P.O. Box 71 Glenfield. NSW. 2167 Australia

Phone: (61.2) 9605 4677 (Monday to Saturday 8.00am to 5.00pm)

Fax: (61.2) 9605 4688

Contact person: George Athan - Mobile: 61 416 057 788

Dianne Athan - Mobile: 61 433 088 399

Emergency Contact Number: 13 11 26 (Australian Poisons Information Centre, 24 Hours)

2. HAZARDS IDENTIFICATION

Hazard Classification: HAZARDOUS SUBSTANCE. NON-DANGEROUS GOODS

This product is classified as hazardous according to the criteria of the NOHSC.

(Harmful Xn.) This product is not classified as dangerous according to the criteria of The Australian Dangerous Goods Code (ADG Code).

Risk Phrases: R65. Harmful: May cause lung damage if swallowed.

R66. Repeated exposure may cause skin dryness or cracking.

Safety Phrases: S2. Keep out of the reach of children.

S23. Do not breathe vapour.

S24. Avoid contact with skin.

S26. In case of contact with eyes, rinse immediately with water and seek medical advice.

S39. Wear eye protection.

S51. Use only in well ventilated areas.

S62. If swallowed, do not induce vomiting: seek medical advice immediately and show the container or label.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Contains 24.8% w/w of liquid hydrocarbon solvent. The CAS number a description of the liquid hydrocarbon solvent is: 64742-47-8 "Distillates (petroleum) hydro treated light". Contains 75.2% w/w of other ingredients determined not to be hazardous.

Mirrorfinish Metal Polish Pty.Ltd

MATERIAL SAFETY DATA SHEET. “Mirrorfinish Metal Polish

Effective date: Jan. 1, 2009

4. FIRST AID MEASURES

Inhalation: Remove to fresh air. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.

Skin contact: Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available.

Eye contact: Flush eyes with water for fifteen minutes while holding eyelids open. If redness, burning, blurred vision, or swelling or other problems persist, transport nearest medical facility for additional treatment.

Ingestion: If swallowed, DO NOT induce vomiting. Transport to nearest medical facility for additional treatment. If vomiting occurs spontaneously. Keep head below hips to prevent aspiration.

Advice to Doctor: May cause central nervous system depression. Dermatitis may result from prolonged or repeated exposure. Potential for chemical Pneumonitis. Consider gastric lavage with protected airway, administration of Charcoal.

5. FIRE FIGHTING MEASURES

Suitable extinguishing media: Use foam, water spray or fog. Dry chemical powder, carbon dioxide sand or earth may be used for small fires only. Do not use a water jet. Do not discharge extinguishing waters into the aquatic environment.

Hazards from combustion products: Carbon monoxide may be evolved if incomplete combustion occurs. Vapours may be heavier than air and spread along the ground so distant ignition may be possible.

Precautions for Fire Fighters: Wear full protective clothing and self-contained breathing apparatus. See also Section 4 “First Aid Measures” and Section 10 “Stability and Reactivity”/

Hazchem Code: Not applicable

Effective date: Jan. 1, 2009

Page 3 of 6

6. ACCIDENTAL RELEASE MEASURES

Emergency procedures: Keep public away. Shut off source if possible to do so without hazard. Beware: spills are slippery. Advise authorities if substance has entered a watercourse or sewer or has contaminated soil or vegetation. Take measures to minimise the effect on groundwater. contain spilled liquid with sand or earth.

Methods and materials for containment and clean up: Scrape up with shovels and place in suitable containers for disposal. Consult an expert on disposal of recovered material to ensure conformity to local disposal regulations. See Section 4 “First Aid Measures” and Section 10 “Stability and Reactivity”.

7. HANDLING AND STORAGE

Precautions for safe handling: Keep container closed. Handle with care. Compatibility with Plastic materials may vary; we therefore recommend that compatibility be tested prior to use. **Conditions for safe storage:** Store in a cool, well-ventilated place away from direct sunlight and other heat sources. Protect from freezing or product may separate. Container remains hazardous when empty (see also Section 13). Continue to observe all precautions.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure Standards: None allocated.

Biological limit values: No Biological limit allocated.

Engineering controls: Ventilation is required as for all polishing operations. Use only in a well-ventilated area.

Personal protective equipment:

Eye protection: Wear safety glasses.

Skin protection: Wear long sleeves and PVC or nitrile gloves.

Respiratory protection: Wear a type P1 disposable mask or higher.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Viscous pale green liquid.

Odour: Faint pine fragrance

pH: 9

Vapour pressure: Data not available

Vapour density: Data not available.

Boiling Point: 0 C

Effective date: Jan. 1, 2009

Page 4 of 6

Freezing Point: 0 C

Solubility: Exact figure not available, but product is dispersible in water.

Specific Gravity: 1.5

10. STABILITY AND REACTIVITY

Chemical stability: Stable

Conditions to avoid: Protect from freezing or product may separate.

Incompatible materials: Avoid strong oxidising products.

Hazardous decomposition products: Carbon monoxide may be evolved if incomplete combustion Occurs.

Hazardous reactions: Low hazard. Material can form flammable mixtures or can burn only upon heating to temperatures at or above the flash point, which is 73 C (PMCC).

12. TOXICOLOGY INFORMATION

Acute:

Inhalation: May cause mild irritation.

Skin contact: Expected to be of low toxicity: LD502000 mg/kg (rat). Frequent or prolonged contact may defat and dry the skin, leading to discomfort and dermatitis. Skin contact may aggravate an existing dermatitis condition.

Eye contact: Will cause irritation.

Ingestion: Expected to be of low toxicity: LD502000 mg/kg (rat). Aspiration into lungs. When swallowed or vomited may cause chemical pneumonitis which can be fatal.

Chronic:

No data is available for this product.

12. ECOLOGICAL INFORMATION

Ecotoxicity: No acute toxicity to aquatic organisms is expected. Long term adverse effects to Aquatic organisms are not expected.

Persistence and degradability: The hydrocarbon solvent component in this product is expected to biodegrade readily, (oxidises rapidly by photo-chemical reactions in air), but has the potential To bio-accumulate. Other components are not hazardous according to the criteria of the NOHSC.

Mobility: This product will not float in water. It will migrate into the sediment. It is expected To have low mobility.

Effective date: Jan. 1, 2009

Page 5 of 6

13. DISPOSAL CONSIDERATIONS

Empty containers should be drained almost completely by inverting them. After draining, vent the empty container in a safe place to allow any remaining hydrocarbon solvent to biodegrade. The remaining material is not hazardous according to the criteria of the NOHSC.

The generator of the waste has the responsibility for proper waste classification, transportation and disposal. Classify waste under applicable and local regulations.

14. TRANSPORT INFORMATION Land: This product is not classified as dangerous according to the criteria of the Australian Dangerous Goods Code (ADG Code).

Sea: This product is not classified as dangerous according to IMDG regulations.

Air: This product is not classified as dangerous according to IATA regulations.

Additional information: Protect from freezing or product may separate.

15. REGULATORY INFORMATION

SUSDP Schedule: This product is not listed on any schedule of the SUSDP as the concentration of the liquid hydrocarbon solvent is 25.0%.

16. OTHER INFORMATION

The date of preparation of this MSDS was Jan 1, 2009.

This MSDS was prepared with reference to the MSDS for each component of this material, and with Reference to the following documents:

Approved Criteria for Classifying Hazardous Substances NOHSC: 1008 (1999).

Australian Code for the Transport of Dangerous Goods by Rail and Road, 6th Edition, (ADG Code).

List of designated Hazardous Substances NOHSC: 10005 (1999).

National Code of Practice for the Preparation of Material Safety Data Sheets, 2nd Edition NOHSC:2011(2003).

Standard for the Uniform Scheduling of Drugs and Poisons, No.18. (Effective date May 2, 2003.)
